FEMA Region 6 Weather Threat Briefing

Friday June 25, 2021

Disclaimer: The purpose of this briefing is to provide a **Regional** weather threat assessment and is meant as a general overview. County/Parish decision makers should consult their local NWS forecast offices for the latest detailed, local weather information. To find your local NWS forecast office, go to www.weather.gov/srh.

Summary of the Upcoming Week

SR ROC
REGIONAL OPERATIONS CENTER

- **Slight risk of severe storms over the TX/OK Panhandles into NW & N-Central OK today & for E NM into the TX South Plains tomorrow. Damaging winds and hail are the main threats.**
- **Scattered heavy rain/flash flooding possible for much of OK by late today expanding into NW TX & NW AR tomorrow and Sunday (also into SE NM on Sunday).**
- **A strong tropical wave over the far eastern Atlantic has a low chance of development as it moves into the central Atlantic.**
 - **No impacts to FEMA 6 in the next 5 days.**

FEMA Region 6 Threat Matrix

Jun 25, 2021 - Jun 29, 2021

SR ROC
REGIONAL OPERATIONS CENTER

DAY / THREAT	Fri	Sat	Sun	Mon	Tue
Severe Storms	TX/OK Panhandles NW&N-Central OK	E NM,TX South Plains			
Heavy Rain / Flash Flooding	OK	OK, NW TX, NW AR	OK, NW TX, NW AR, SE NM		
Fire Weather					
Tropical Winds / Surge					
Heat					
River Flooding	SE TX,AR, LA	SE TX,AR, LA	SE TX, S AR, LA	SE TX, S AR	SE TX, S AR

	No Weather Threats Expected
	Very Common – Happens Often
	Common – Happens Frequently
	Uncommon – A Few Times a Year
	Rare – Once Every 1-5 Years
	Very Rare – Once Every 5-10 Years

Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.

For more details on the colors in the threat matrix refer to the last slide in this briefing.

Tropical Weather Outlook – Atlantic/Gulf

5-Day Precipitation Forecast & River Flood Status

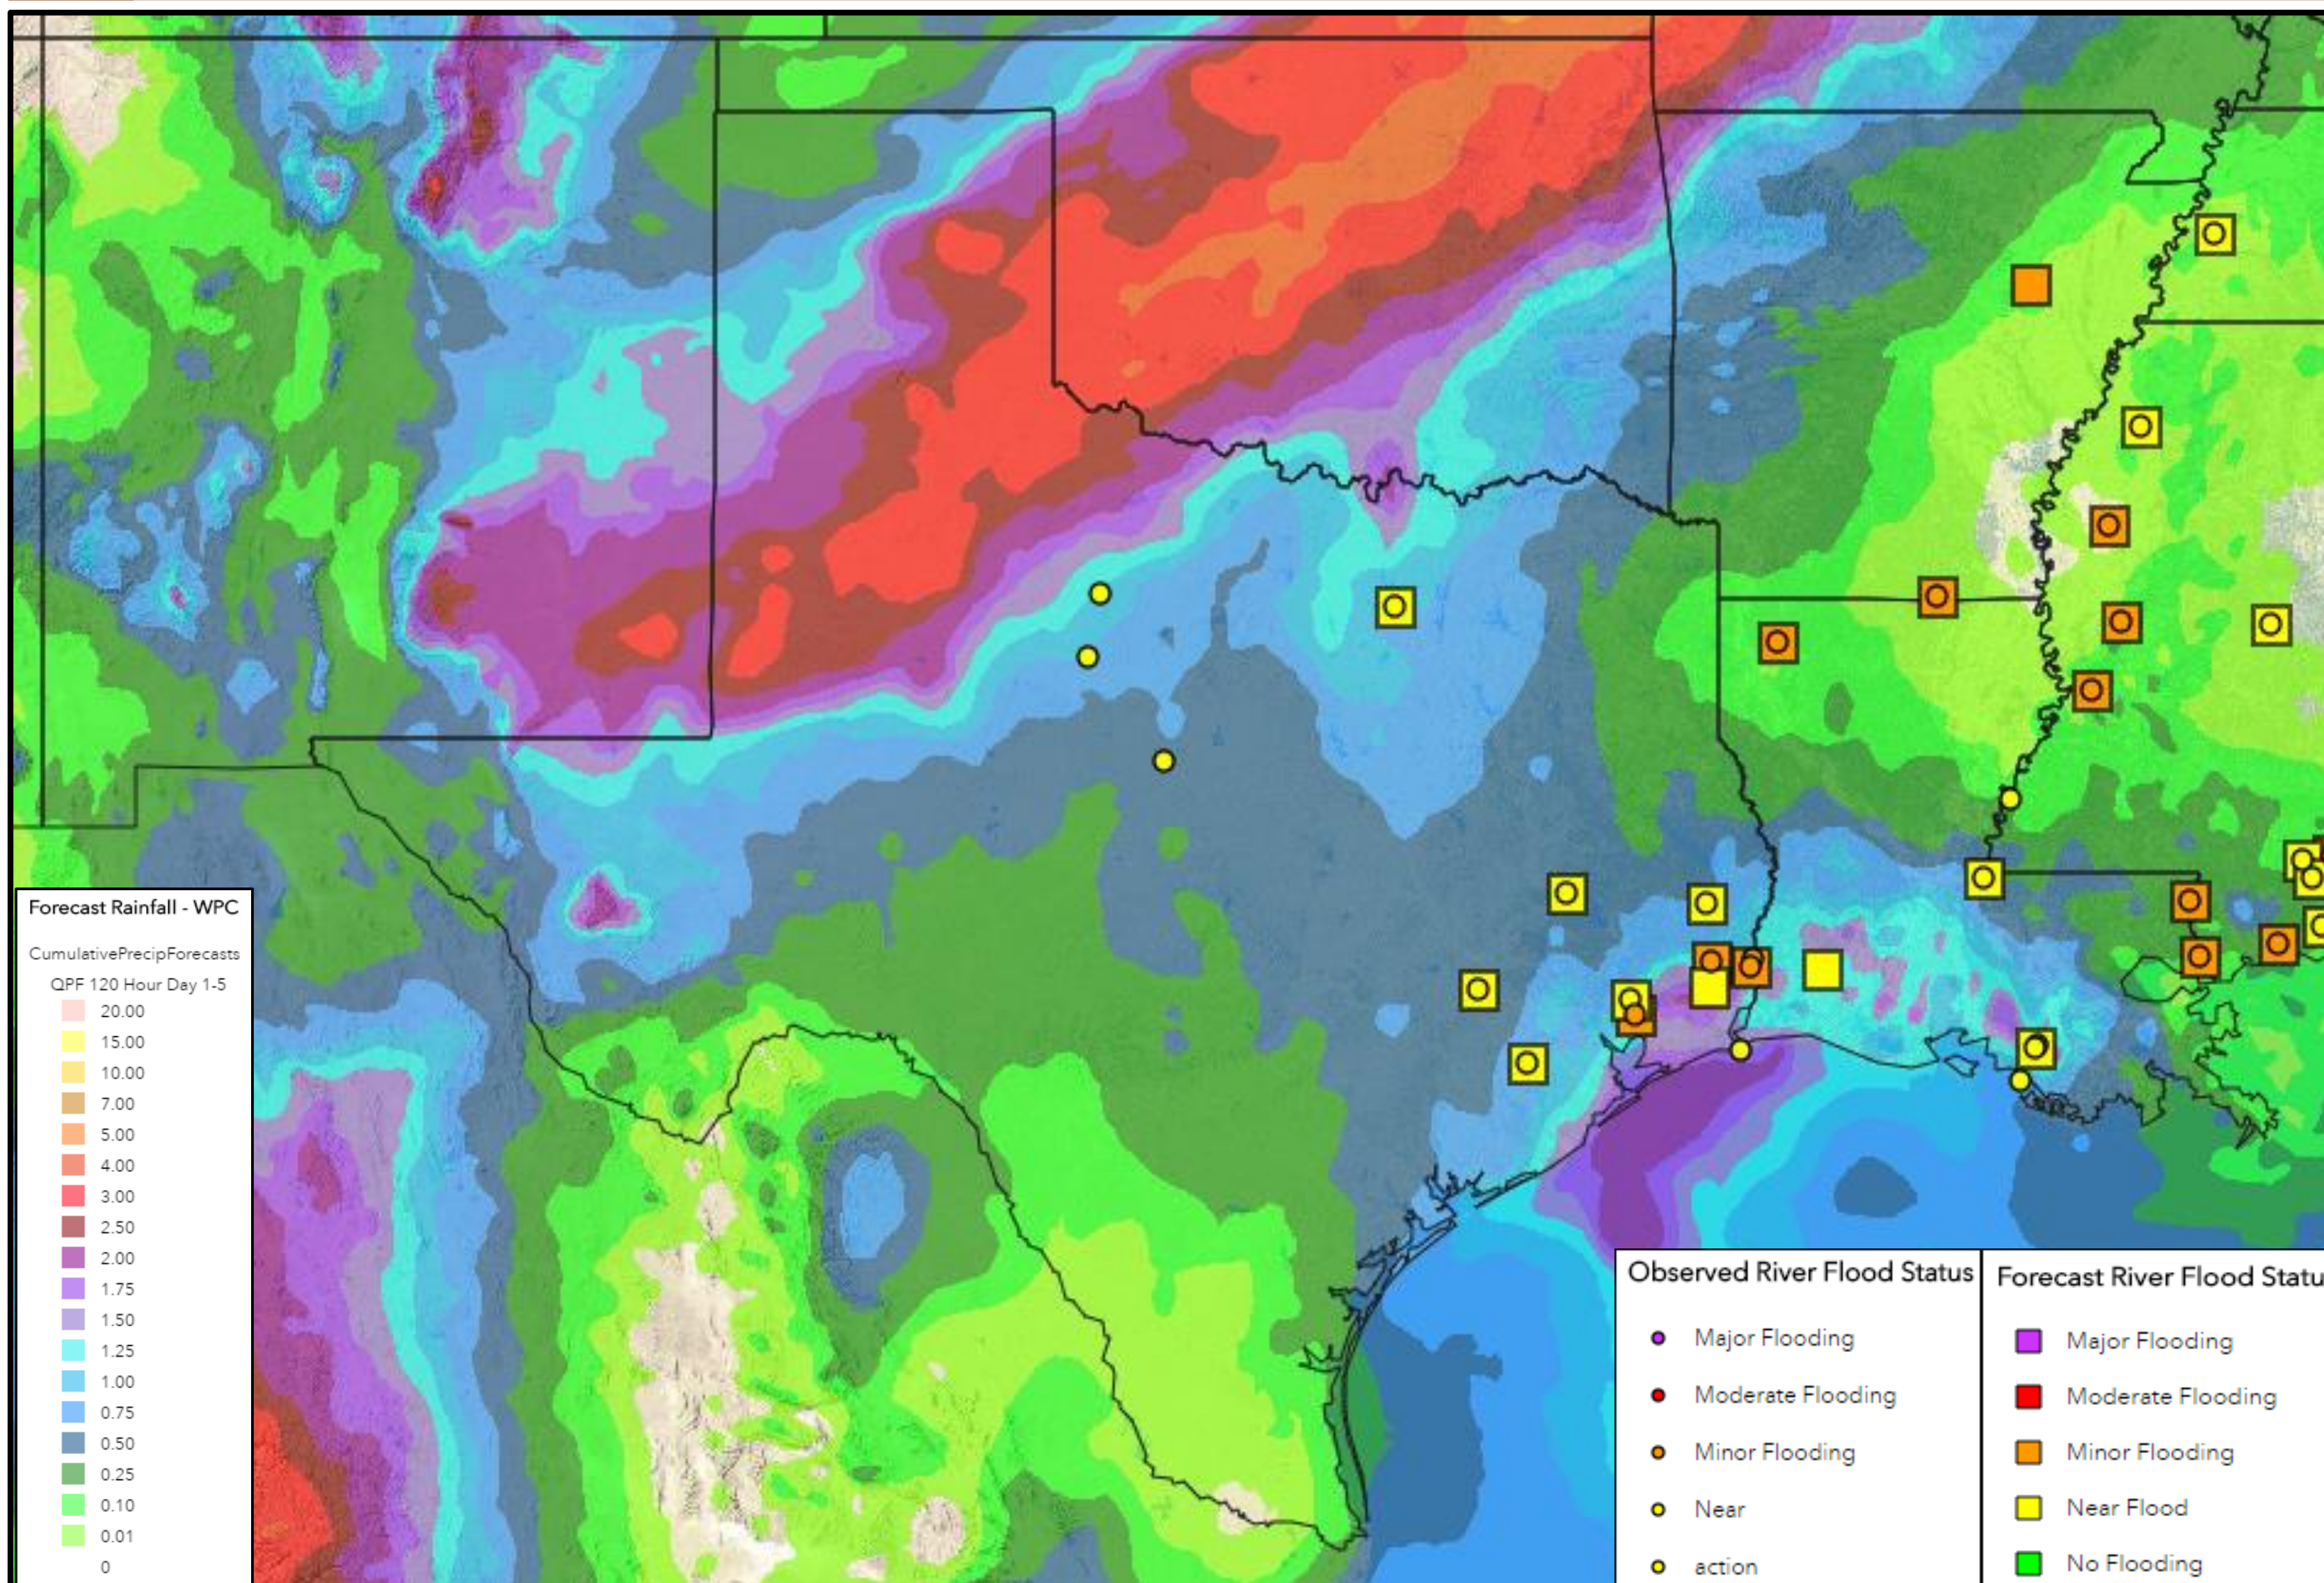

SR ROC
REGIONAL OPERATIONS CENTER

Note: Even though the image displays 5 days of forecasted rainfall, river forecasts only include 1-2 days of rainfall

Isolated minor river flooding continues across SE TX, AR, and LA with flooding of agricultural, recreational areas and secondary roads.

Forecast rainfall the next 5 days is not expected to lead to widespread additional river flooding but may slow recessions of current river flooding in SE TX and/or cause isolated rises of rivers in OK and TX.

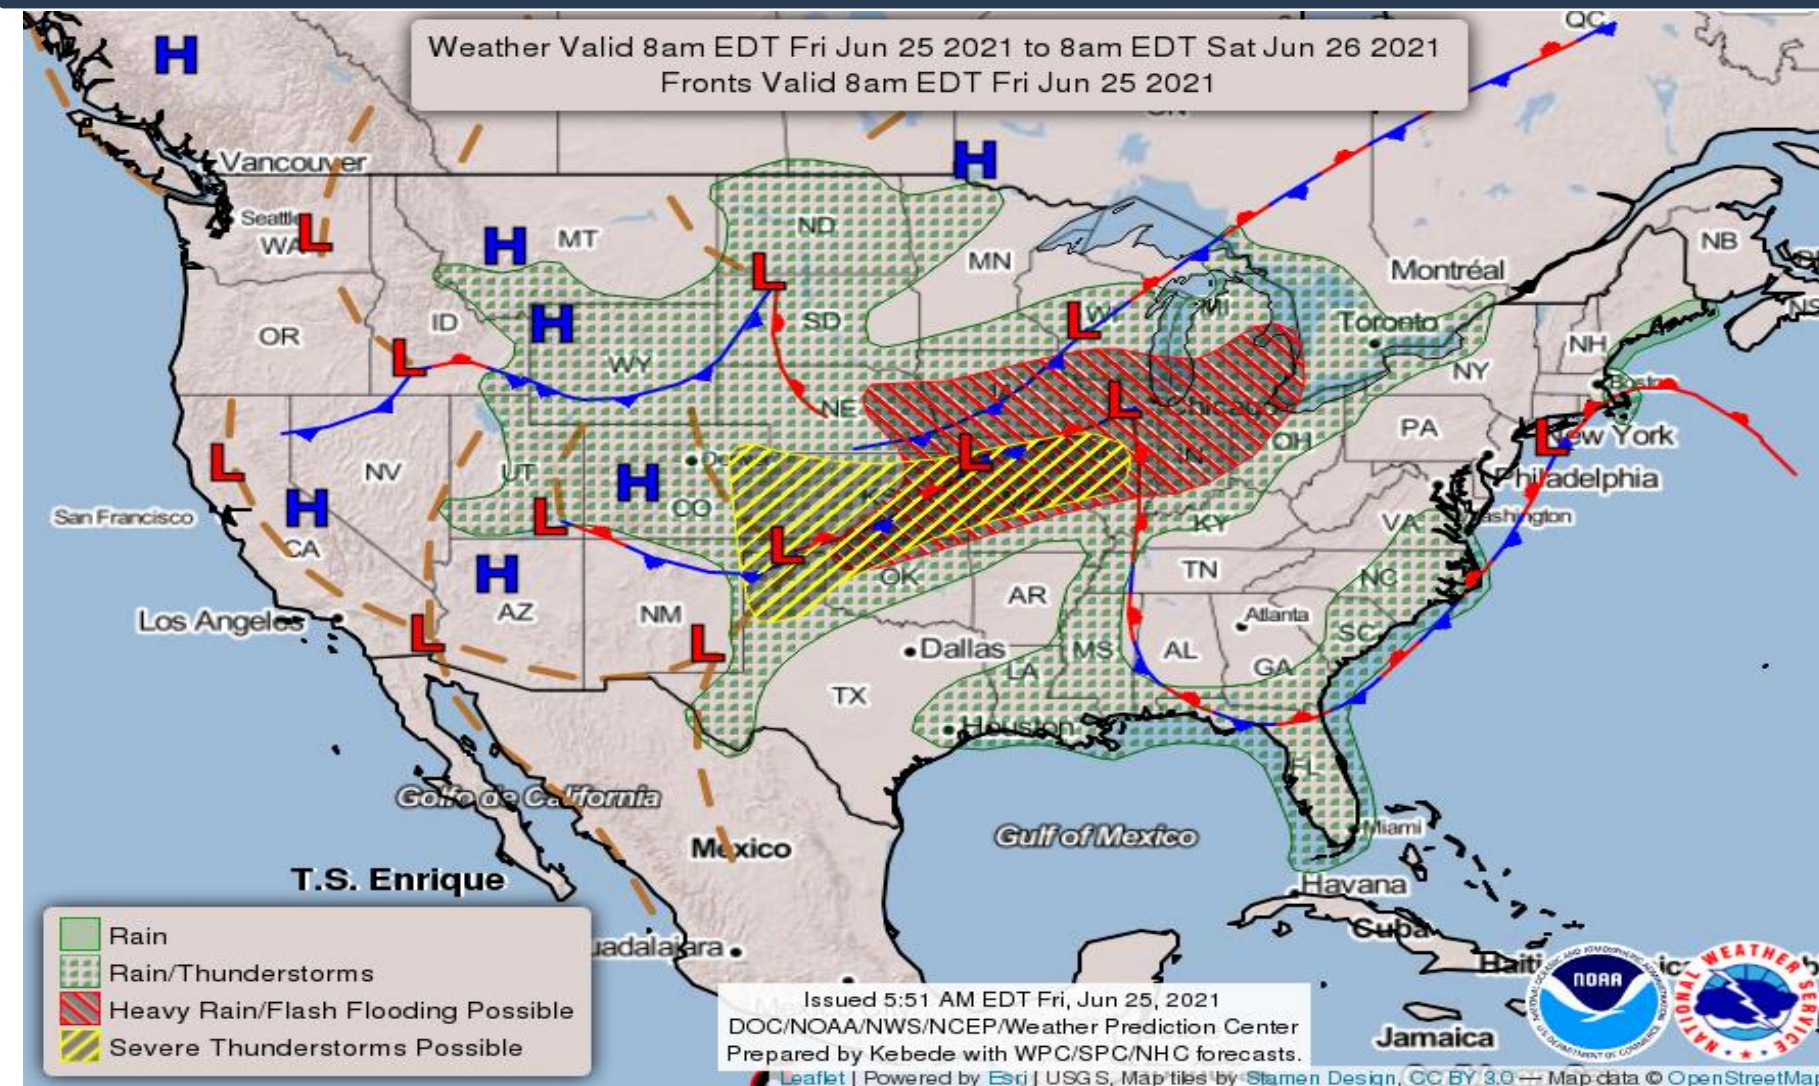

Today's Weather

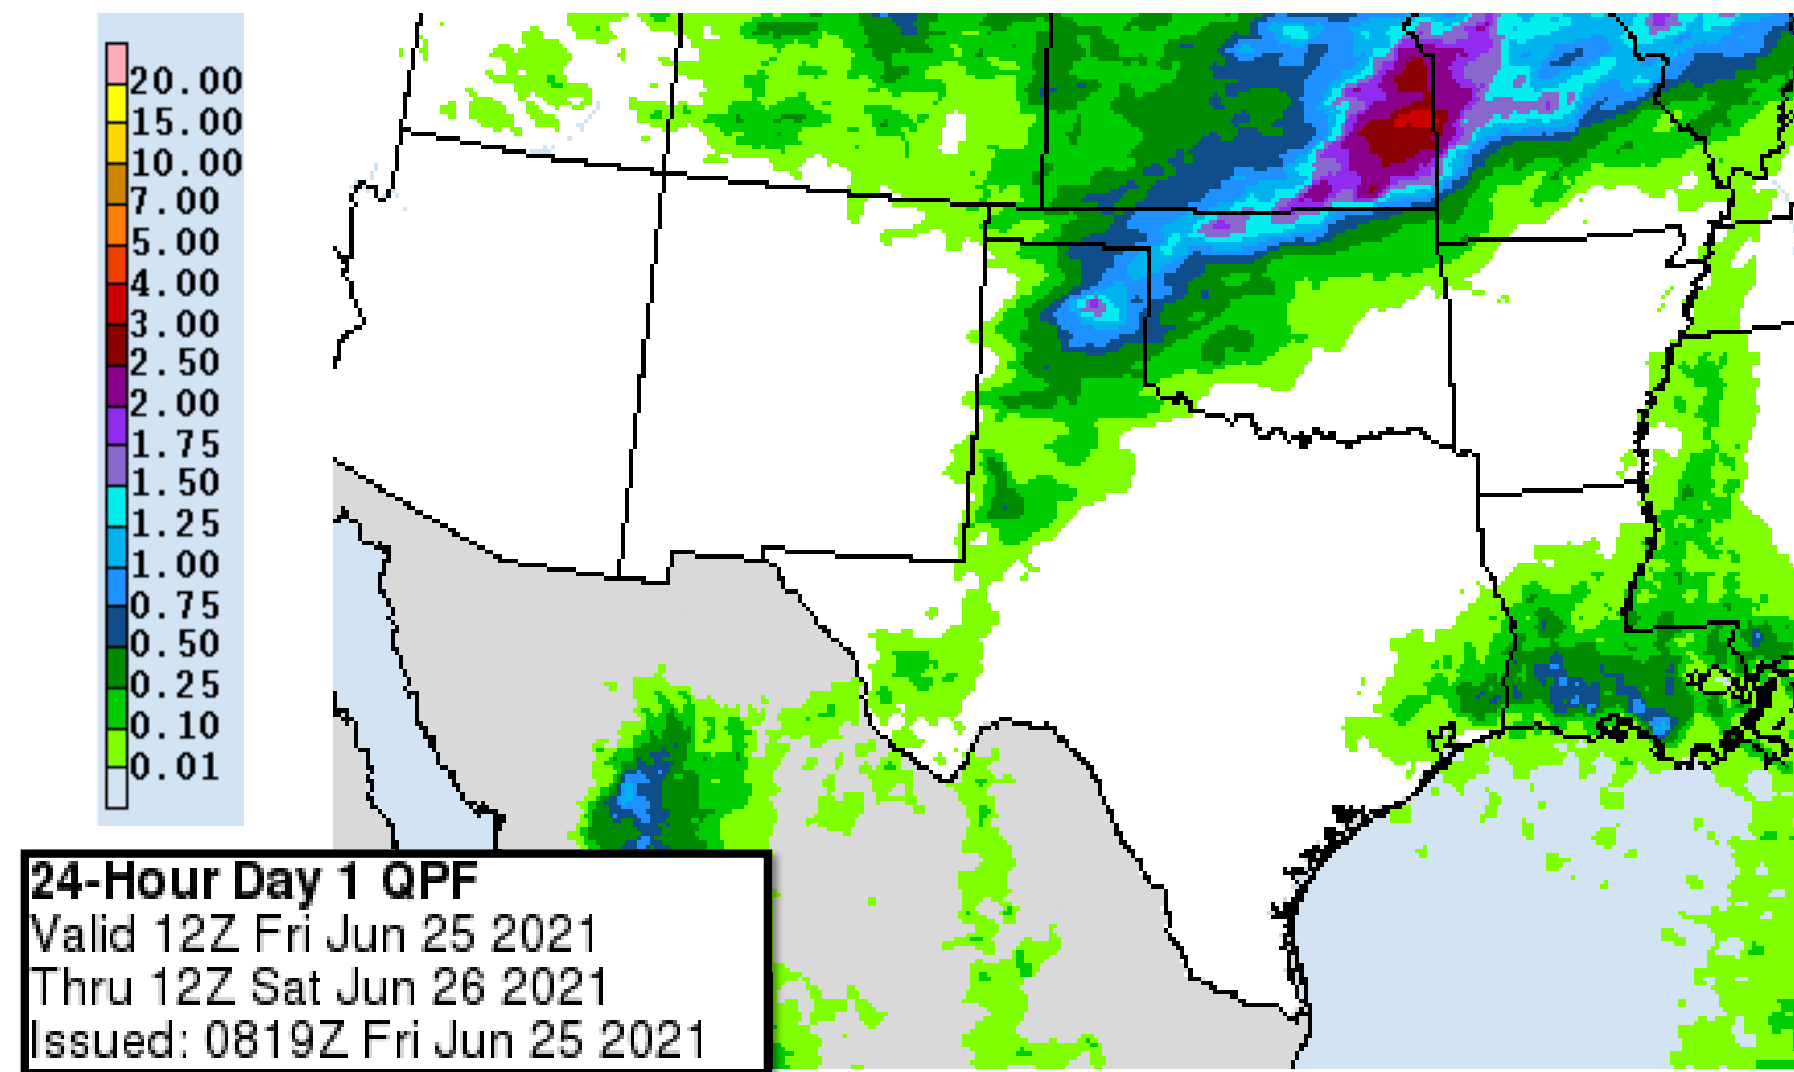

SR ROC
REGIONAL OPERATIONS CENTER

Forecast Chart

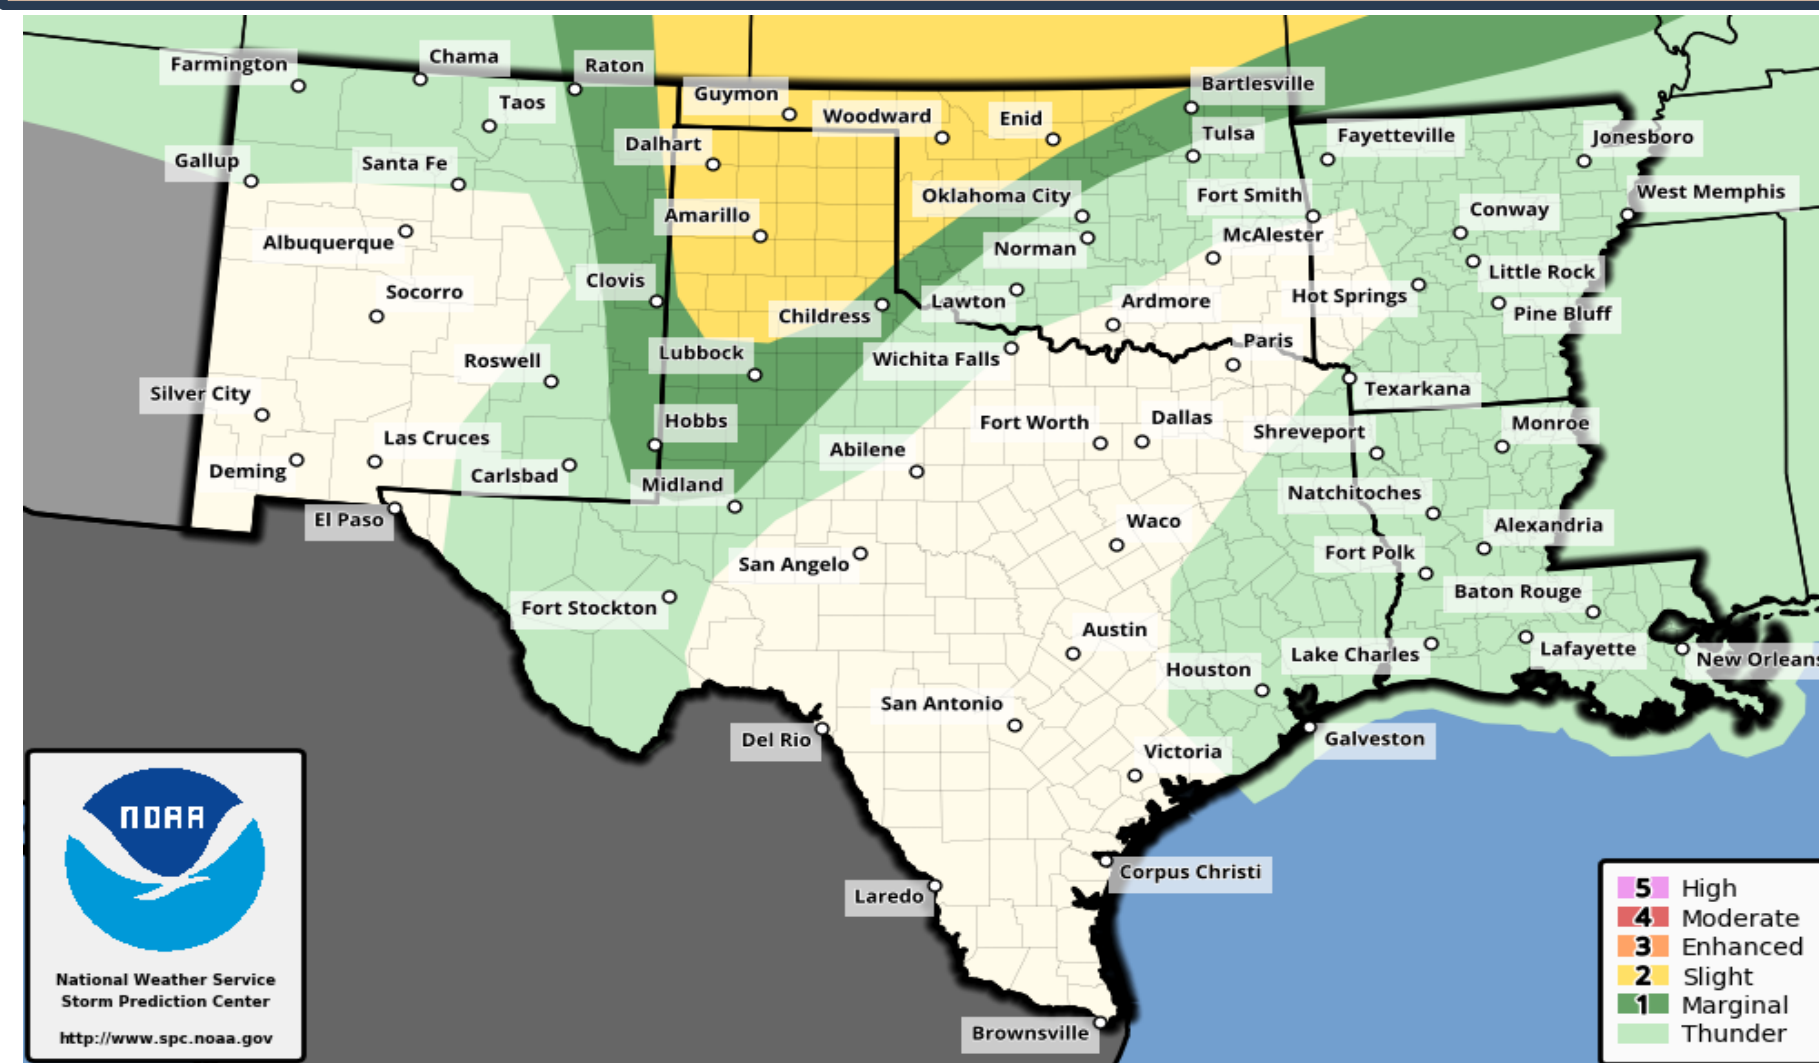

Forecast Rainfall

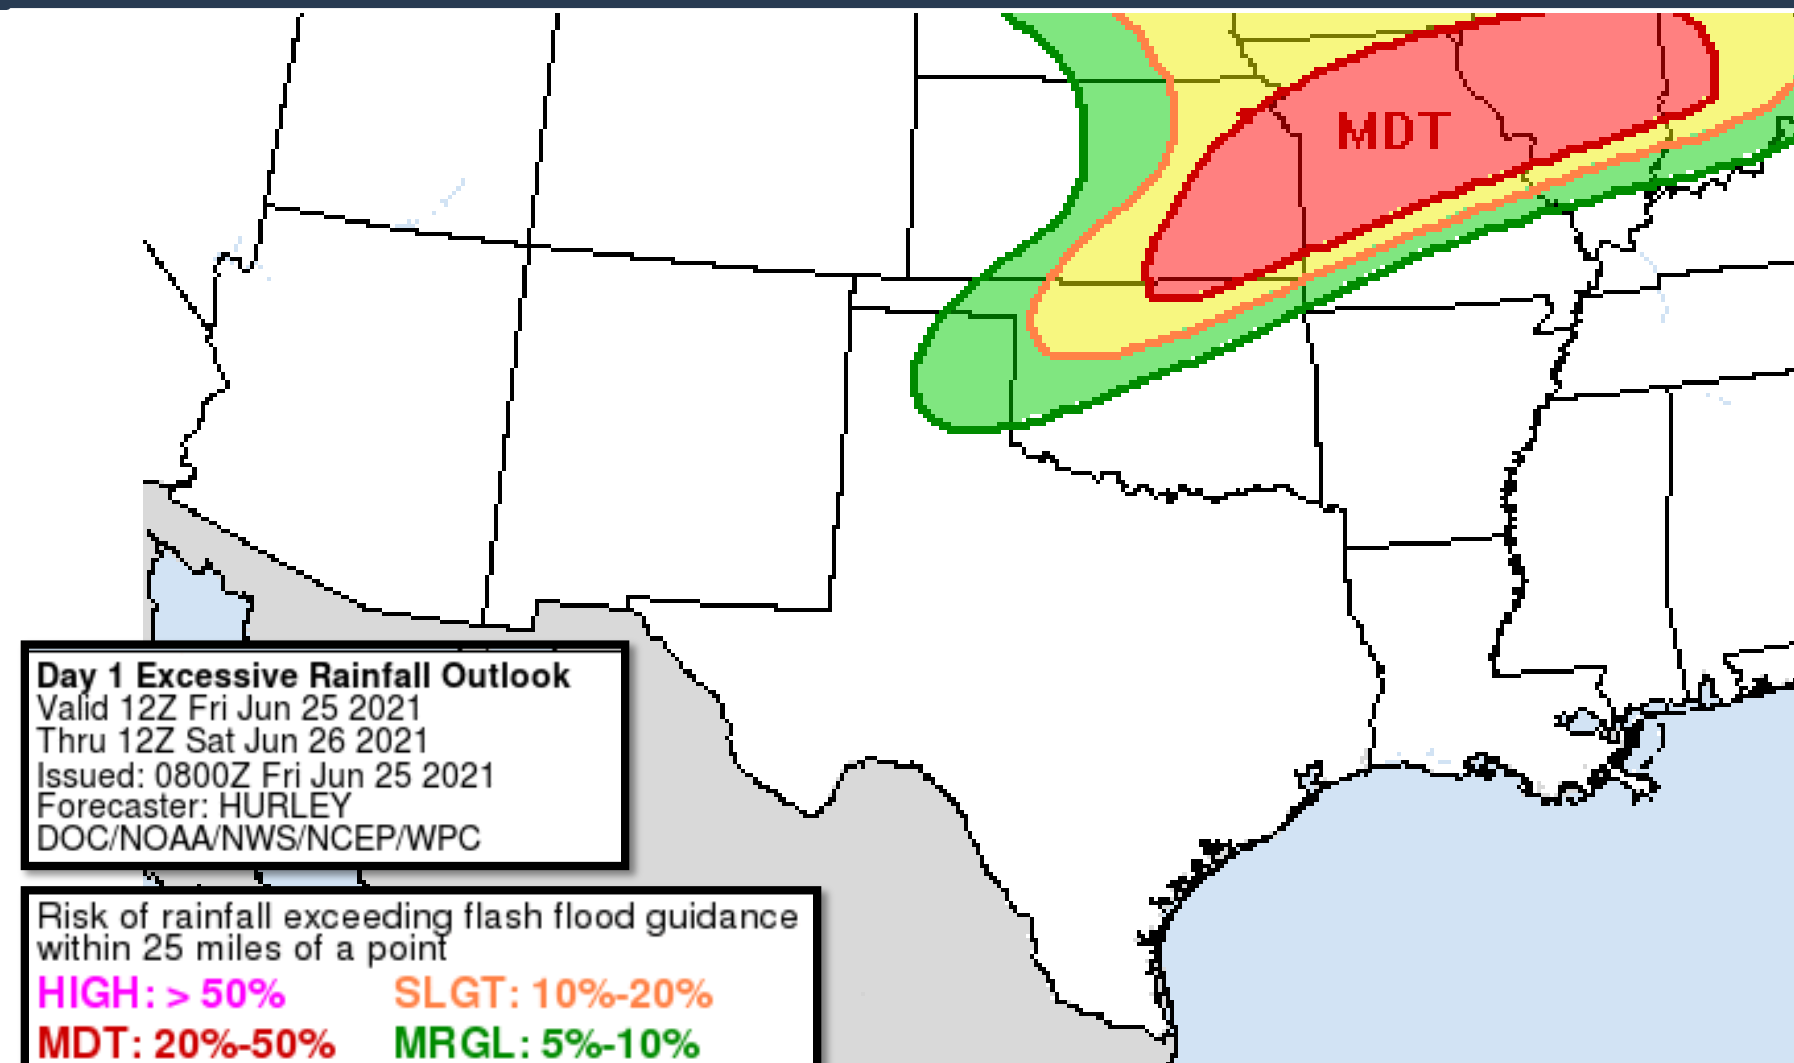

Slight risk of severe storms over the TX/OK Panhandles into NW & N-Central OK; damaging winds and hail are the main threats.

**Scattered heavy rain/flash
flooding possible for much of
OK by late today.**

Severe Weather Outlook

Excessive Rainfall Outlook

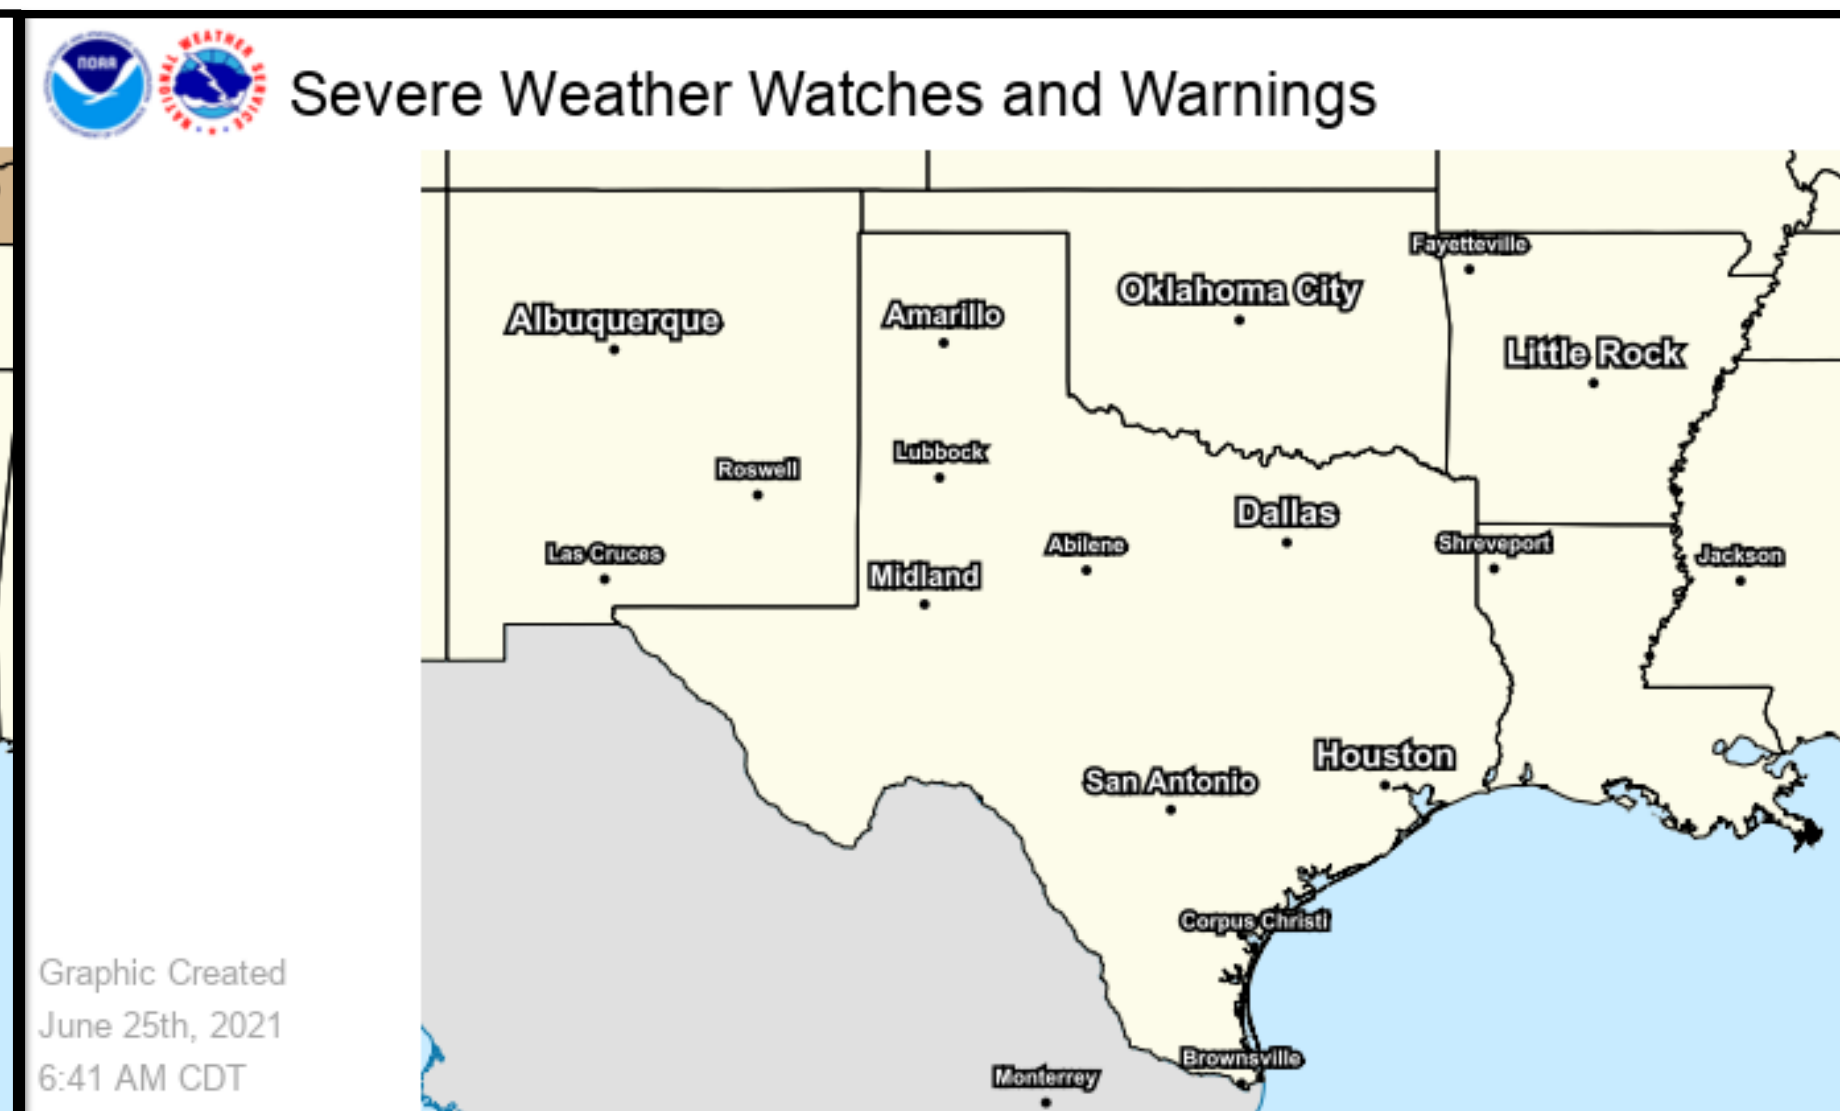

Watches, Warnings, and Advisories

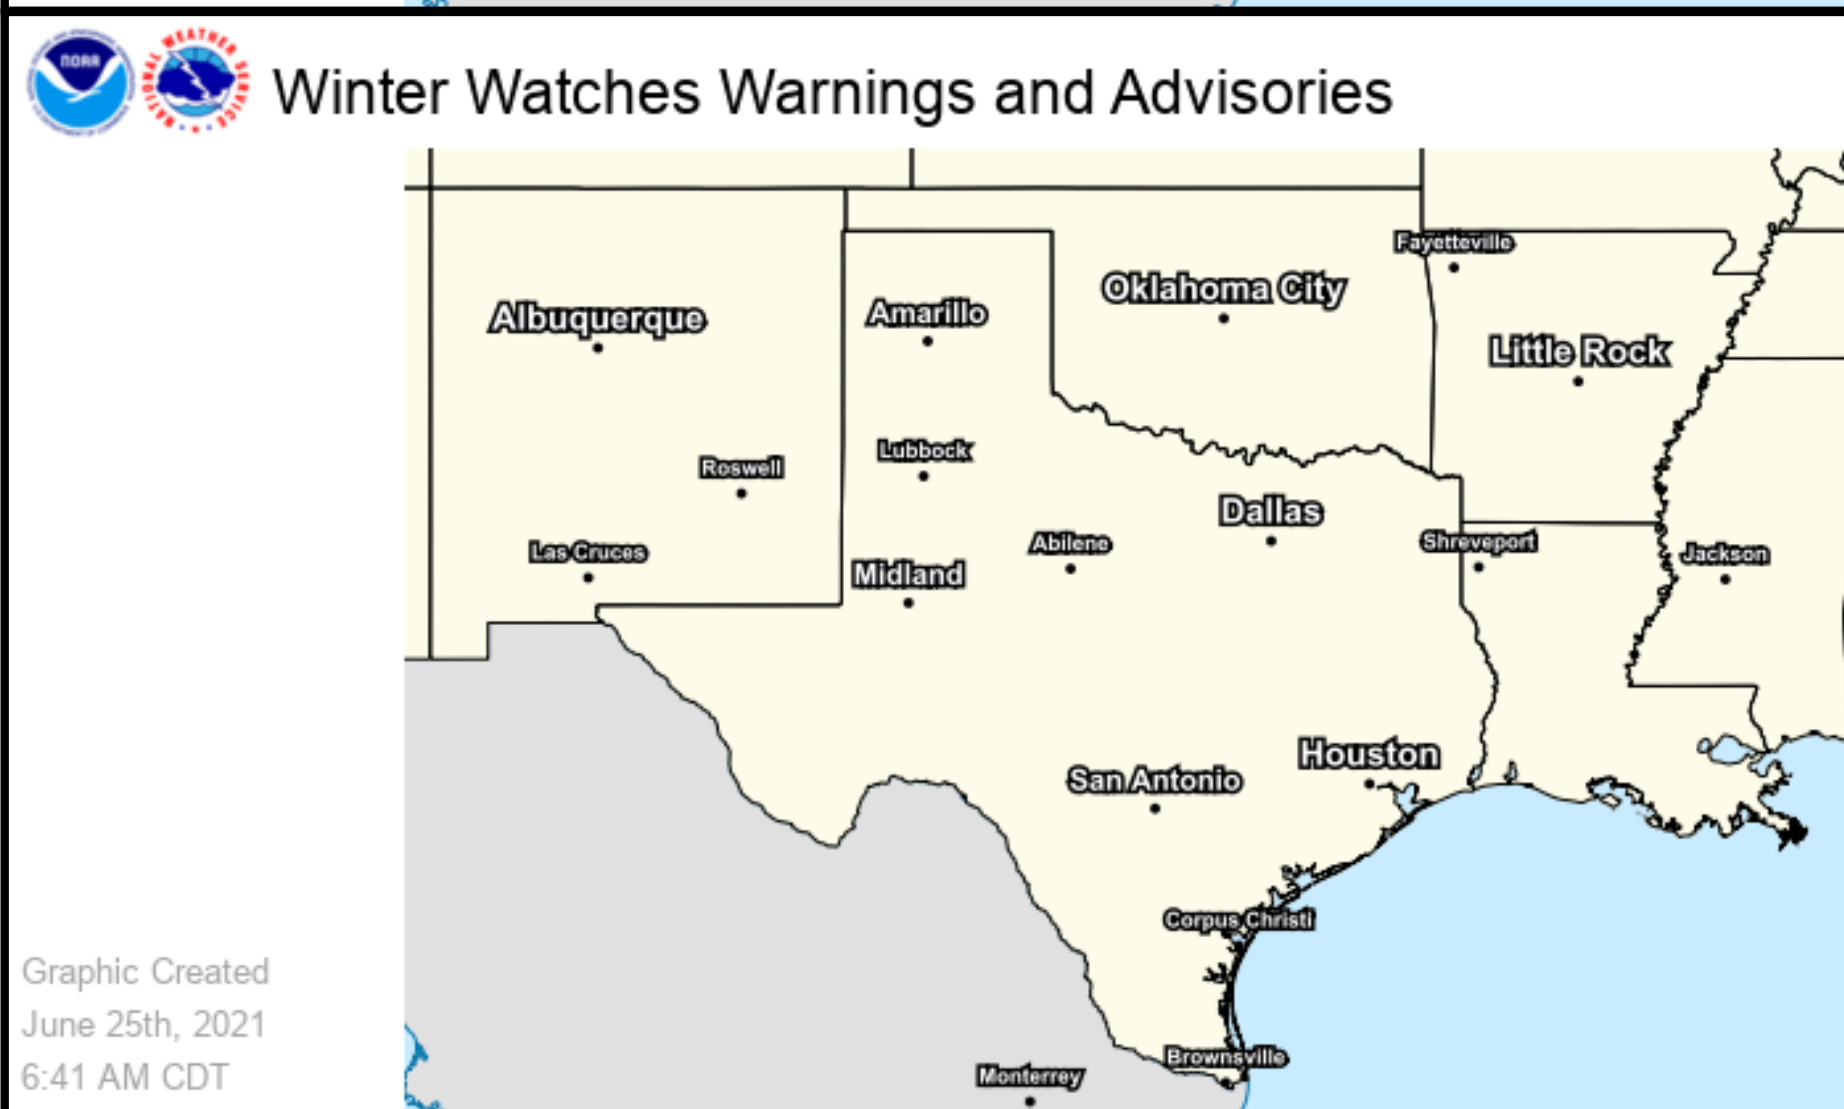

Wind, Severe, Winter, and Flood Hazards

SR ROC
REGIONAL OPERATIONS CENTER

Flood Watch in effect from this evening through Sunday afternoon across western and central OK.

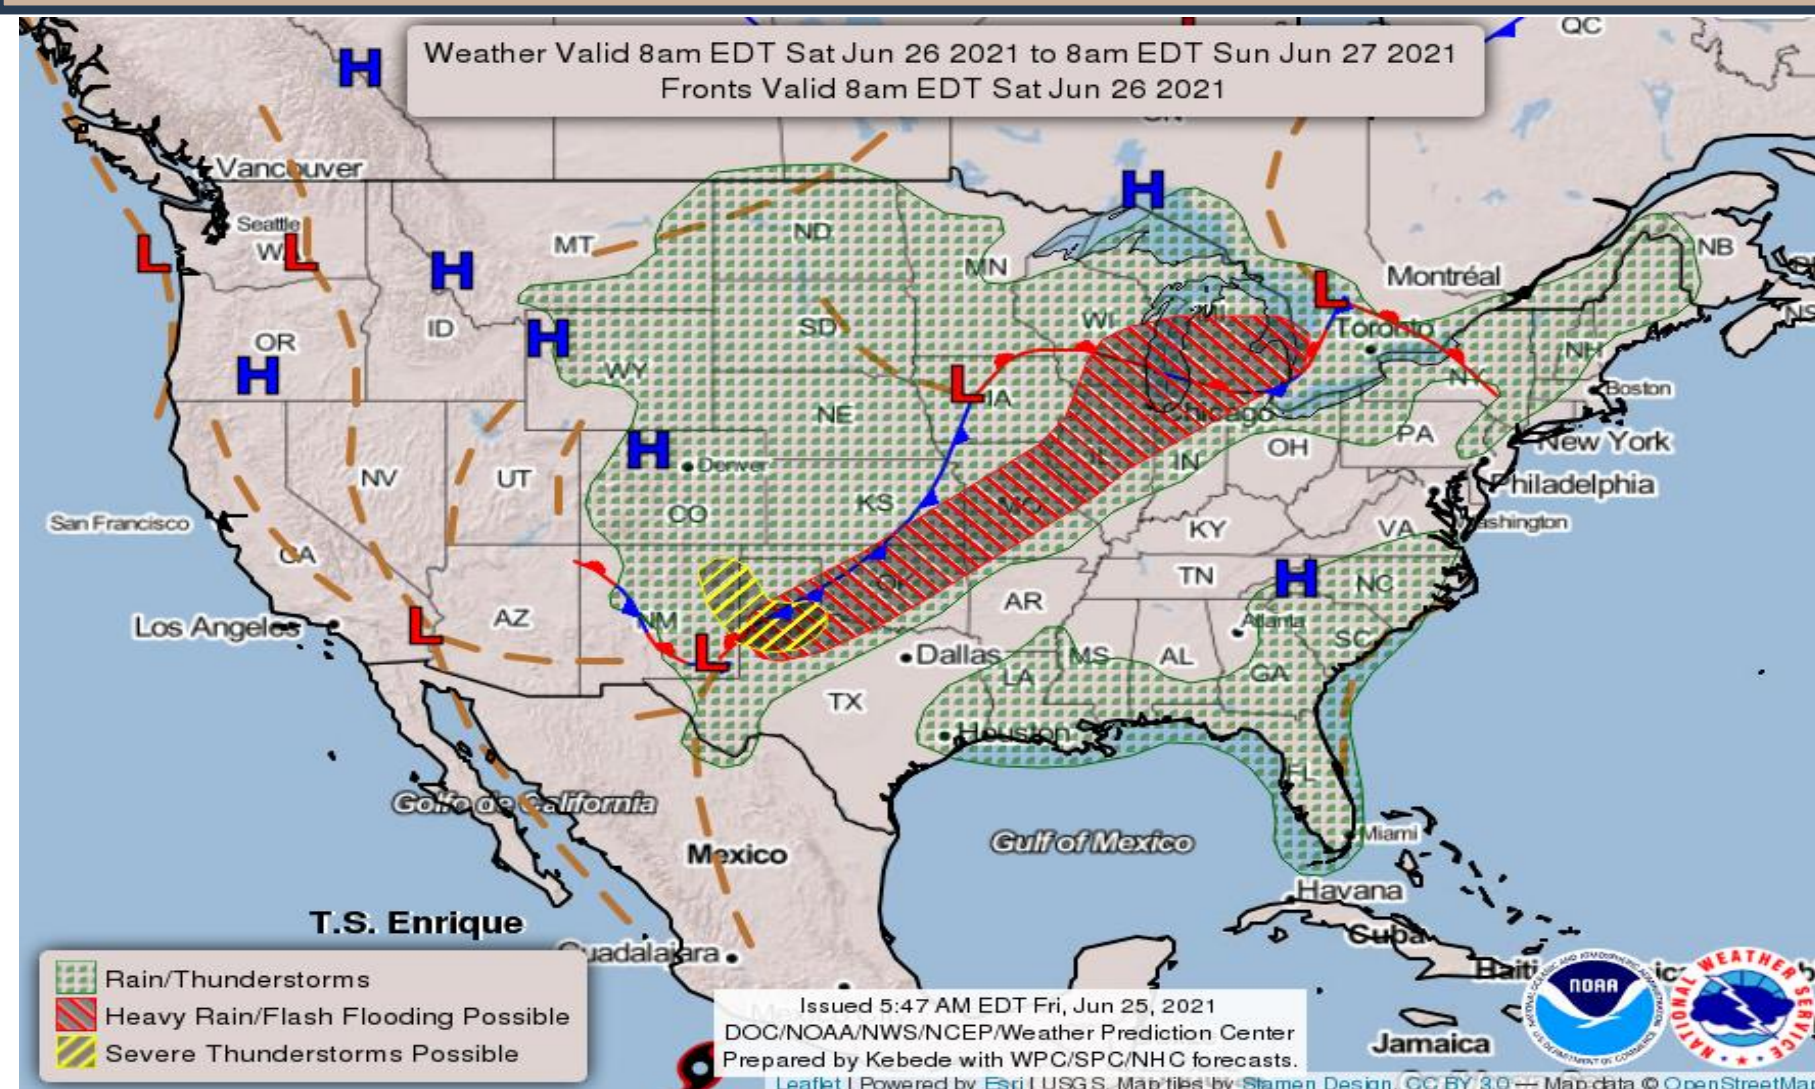

Tomorrow's Weather

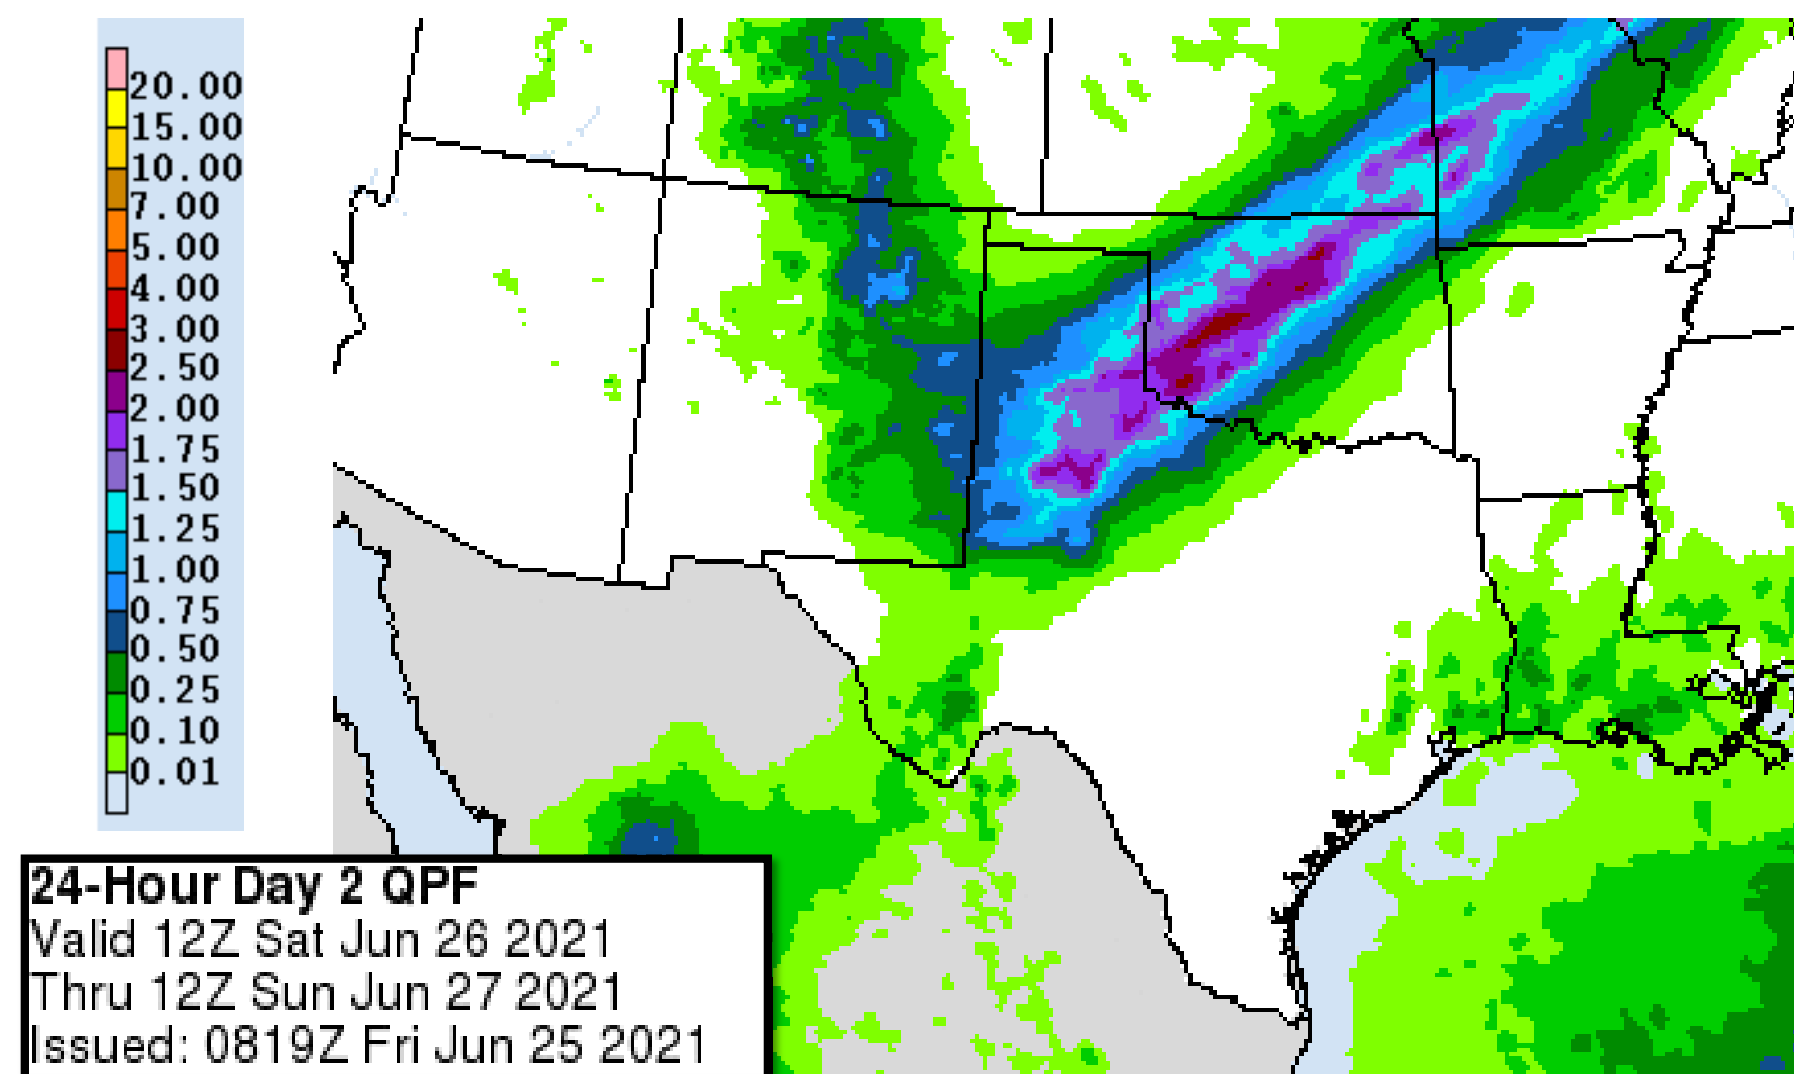

SR ROC
REGIONAL OPERATIONS CENTER

Forecast Chart

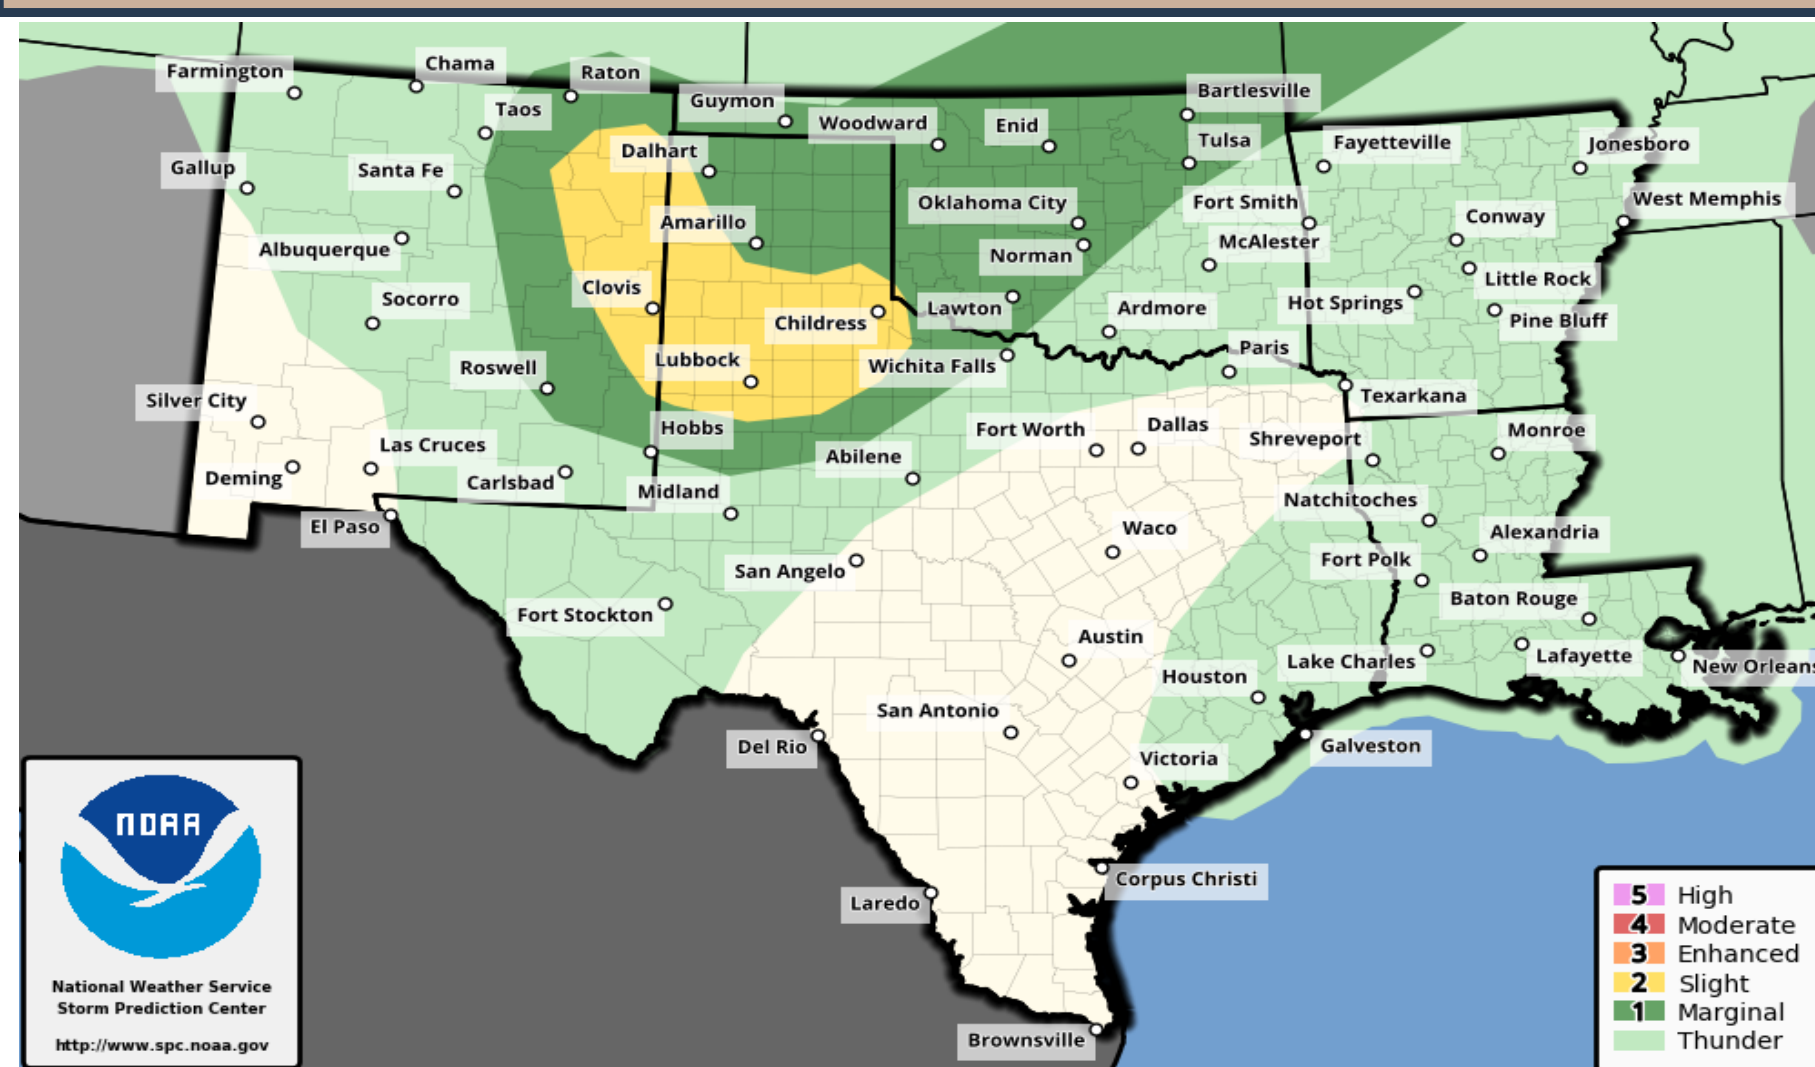

Forecast Rainfall

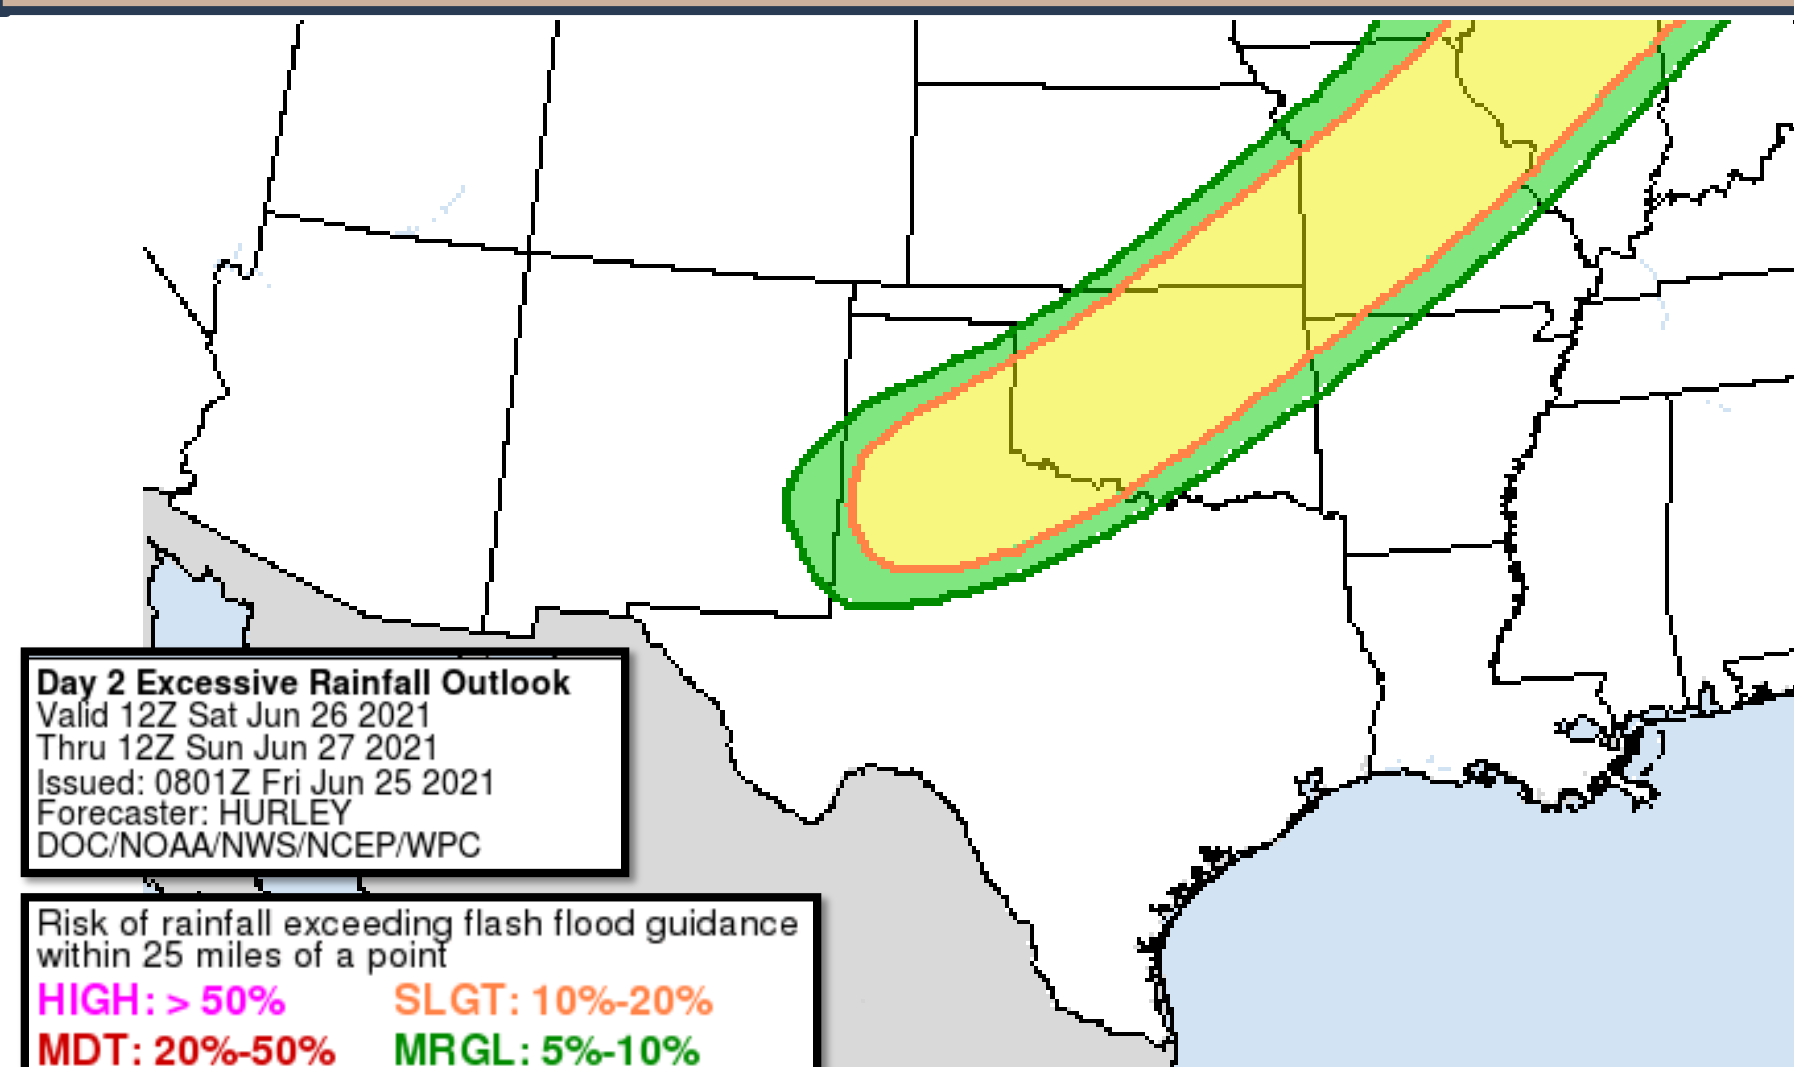

**Slight risk of severe storms
over E NM into the
TX South Plains; damaging
winds are the main threat.**

**Scattered heavy rain/flash
flooding possible over OK into
NW TX and NW AR.**

Weather “Threat” Matrix			
Color	Definition	Criteria	Example(s)
Green	Very Common Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Little Inconvenience to Daily Routines	Severe: Marginal Risk from SPC Flooding: Minor flooding expected over localized areas Tropical: None Fire Weather: No Watches/Warnings, fuel moisture above 10% or green up active	<ul style="list-style-type: none"> Thunderstorms expected over LA this afternoon; a few may produce winds to knock down a few trees Something that happens almost every day in a particular season such as <u>seabreeze</u> storms in coastal TX
Yellow	Somewhat Common – Happens Frequently Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Some Inconvenience to Daily Life	Severe: Slight Risk from SPC Flooding: Nuisance flooded expected for a widespread area, or Minor flooding expected over isolated areas Tropical: A weak tropical wave expected to move towards or near any coastline Fire Weather: Red Flag Watches/Warnings and/or SPC outlines enhanced or critical fire outlook	<ul style="list-style-type: none"> 2-3 inches of rainfall expected over central AR today and tonight; some minor (brief) street flooding possible Scattered severe storms possible, one or two tornadoes expected, along with reports of strong winds/wind damage and ~1” hail
Orange	Uncommon – A Few Times a Year Safety: Often Threatening to Life and Property, Some Damage Unavoidable Impact Potential: Typically Results in Minor Disruption to Daily Life	Severe: Enhanced Risk from SPC Flooding: Minor flooding expected over a widespread area (including urban locations), or Moderate flooding expected over isolated areas Tropical: A Tropical Storm expected to move towards or near any coastline Fire: Critical fire outlook for more than 2 consecutive days, Warnings for 2 or more consecutive days, D3-D4 drought conditions	<ul style="list-style-type: none"> A snow/sleet mix is expected to move through or near the DFW area tomorrow morning; travel impacts likely Numerous severe storms possible, a few tornadoes possible along with several reports of wind damage along with damaging hail Some large fires reported, burn bans advertised, critical conditions expected
Red	Rare – Once every 1-5 Years Safety: Extensive Property Damage Likely, Life Saving Actions Also will be Needed Impact Potential: Will likely result in Large Disruption to Daily Life	Severe: Moderate Risk from SPC Flooding: Moderate flooding expected over a widespread area (including urban locations) Tropical: A Hurricane expected to move towards or near any coastline Fire: Large areas of critical conditions for 2 or more days, Warnings for 3 or more days, Severe to extreme drought	<ul style="list-style-type: none"> A Category 1 hurricane will be moving towards the NW Gulf in the next few days Widespread severe storms likely, strong tornadoes, widespread wind damage, and destructive hail Large fires ongoing throughout the area with critical fire weather conditions expected to continue
Purple	Very Rare – Once Every 5-10 Years Safety: Property Damage Unavoidable, Immediate Action to Save Life will be Needed Impact Potential: Typically Results in Long-Lived Widespread Major Disruption to Daily Life	Severe: High Risk from SPC Flooding: Major flooding expected over a widespread area (including urban locations) Tropical: A Major Hurricane (Cat3 or greater) expected to move towards or near any coastline Fire: Large area of critical conditions for 2 or more days, Warnings for 3 or more days, Long term (months) of severe to extreme drought	<ul style="list-style-type: none"> A Category 4 hurricane is headed towards the SE LA; major storm surge, flooding and damaging winds anticipated to begin tomorrow Widespread severe storms expected, tornado outbreak probable with long-lived, very widespread and particularly intense storms

Criteria for the color codes in this briefing is to the left, please provide any feedback to

sr-srh.roc@noaa.gov
